Role-playing Ideas

- Have one member “role play” the position of Firefighter in order to provide a solution.
- You can also divide members into groups in order to develop solutions.
- All past Tactical Decision Games can be viewed at:

You are the senior firefighter assigned to Fire Station 13. It is approximately 1900 hours when your Captain announces over the fire station PA system that Engine 13 is going out on fire prevention inspections. Fire Station 13 has a very high inspection workload and it is not unusual to go out at nighttime. The other firefighter on your crew is a probationary member.

Your first inspection is a two story center hallway apartment house. The Captain and the other Firefighter inspect the first floor while you inspect the second floor. There are no hazards on the second floor. As you walk down the stairs to the first floor you hear a very agitated male yelling obscenities at your Captain. As you reach the bottom of the stairs, you observe the male

civilian, your Captain and the other Firefighter. The civilian sees you approaching, but continues his verbal tirade with your crew. You observe that the civilian has a gun tucked into the back of his pants.

Firefighter Guidelines

- What can you say to your Captain to indicate that the crew is in potential danger?
- What radio message needs to be made to OCD?
