

TACTICAL DECISION GAMES

TDG #1 Solution Worksheet

Email your worksheet to tdg@lafdtraining.org

Fire Floor Considerations:

Crew experience.

Water supply.

Heavy thick black smoke with no fire showing.

Length of time for back up fire attack.

Center core construction.

Fire Floor Company Actions:

I will investigate two floors above the fire and communicate to the IC what I find.

I will have the crew flake the hose up the stairs so we can advance it easier.

I will have the crew hook up 150' to one gate of the gated wye and 50' to the other gate in case the fire wraps around us.

I will communicate to the IC that we are beginning fire attack.

I will go in with the rookie and fight fire and leave the two senior firefighters out of the IDLH.
