

TACTICAL DECISION GAMES

TDG #1 Solution Worksheet

Directions: In order to keep this simple, please list your considerations and company actions. Considerations are items that would influence why you are performing your company actions. Company actions are the tactics that you will have your company perform in order to be successful at this incident. Keep it simple!

Fire Floor Considerations:

Firefighter Safety

Stop horizontal spread of fire

Fire Floor Company Actions:

- *Captain remains in stairwell to become Division 16 Commander. The Probie stays with the Captain. Both members remain in stairwell and establish 50' of hose pack hose to prevent fire from "fish hooking" to veteran firefighters. The Captain and the Probie are the backup team and must maintain radio communications with the two veteran firefighters.*
- *The two veteran firefighters become "fire attack" and utilize 150' of hose pack hose laid from standpipe outlet in stairwell. While staying together they attempt to locate seat of fire, check drop ceiling for fire and maintain communications with Division 16.*
- *Communications to the IC from Division 16 must state the location, extent and nature of the fire when found. Initially two additional engine companies must be requested for fire attack operations on the 16th floor.*
