Role-playing Ideas

- Have one member “role play” the position of Apparatus Operator in order to provide a solution.
- You can also divide members into groups in order to develop solutions.
- Solutions should be submitted via email to tdg@lafdtraining.org
- Solutions from the field can be viewed online at www.LAFDtraining.org.

SINGLE FAMILY DWELLING

The TFC remains on Truck 105 as the IC and directs you to ventilate the structure. Your top member and tiller member ladder the structure for ventilation operations. As you approach the ladder you remember the type of roof construction used in this house.

Apparatus Operator

- Describe Metal Gusset Plate Construction
- Describe Areas of Roof Strength
- Describe Alternative Ventilation Methods
- Review Previous Ventilation Lessons Learned on this type of roof

You are the Apparatus Operator assigned to Truck 105. A new tract of homes has just been constructed in the west end of your district. You have been able to visit this site several times during the construction phase. The one and two story homes utilize metal gusset plate construction in pre-fab roof and floor systems. Task Force 105, Rescue 105,

Rescue 906, Task Force 72, Battalion 17 and EMS 17 are dispatched to a Reported Structure Fire in the neighborhood of the new homes. TF 105 is the first arriving resource onscene. You observe a two story single family dwelling with a small amount of fire showing from the roof of the second floor. E105 performs fire investigation on the first and second floors.
