B	
C	

## Role-playing Ideas

- Have one member “role play” the position of Captain on E89 in order to provide a solution.
- You can also divide members into groups in order to develop solutions.
- Solutions should be submitted via Dept. mail to the Commander of the Tactical Training Group at FHMT C.
- Solutions from the field will be printed in next months “Tactical Decision Games” publication.

## FIRST-IN!

### Situation

You are the Captain assigned to Engine 89. You and your company are on the radio performing fire prevention inspections. You are dispatched to a reported structure fire in your first in district. It is 1500 hours. You are the first arriving company on scene. The rest of the “A” assignment will be arriving shortly. When you arrive on scene, you observe a one story, “L” shaped mini-mall with heavy fire showing in one unit. This mini-mall consists of seven small units. You also observe light smoke in the units on either side of the fire unit. You also observe a large façade that runs the entire front of the building. You give a size up to OCD and your company properly

Use Training Code 08AB for Network Staffing Entries

lays a supply line. Your Engineer spots the apparatus in the parking lot approximately 75’ in front of the fire occupancy. As you exit your apparatus you notice light smoke coming from the facade. It appears to you that the fire has not vented through the roof at this time. Engine 77 states on the tac channel that they are 30 seconds out and they are requesting an assignment. Your nozzle member is a first house probationary firefighter.

Your hydrant member is a three year firefighter who is still at the hydrant awaiting the call for “water”. While donning your SCBA you hear a loud crash and feel a rush of radiant heat from the fire unit. You turn and observe that the fire has now broken out of the fire unit and is lapping up against the facade.

### Captain Guidelines

- Determine company actions
- Place remainder of assignment (E77 & LF89)
- Order additional resources
