

TACTICAL DECISION GAMES

Use Training Code O8AU for Network Staffing Entries

Role-playing Ideas

- Have one member “role play” the position of Captain in order to provide a solution.
- You can also divide members into groups in order to develop solutions.
- Solutions should be submitted via email to tdg@lafdtraining.org
- Solutions from the field can be viewed online at www.LAFDtraining.org.

IMPROVISED EXPLOSIVE DEVICE?

D

You are a Captain assigned to a single Engine Company in the downtown area of your City. This area is a heavily congested area with both vehicular and foot traffic. It is 1230 hours when your Engine is dispatched to a rubbish fire. The location of the rubbish fire is on a narrow one-way street. This street is a lunch time favorite for the many civilian workers in the area. There are many places to eat and shop. The sidewalks are very wide. As you respond down this street you observe the rubbish fire in a

wire mesh trash can. It is a small fire and your crew goes to work on it. A civilian approaches you and states that the fire is the result of a small explosion in the trash can. Your nozzle firefighter gets your attention and points out a cell phone strapped to the bottom of the wire mesh trash can. It is similar to the one in Diagram #1. While you are inspecting the cell phone, you hear two separate minor explosions down the street. Two more trash cans have now burst into flames.

There are no injuries to nearby civilians. A few seconds later a large explosion rips apart what appears to be a parked car. This explosion takes place approximately 200 yards away from you and your crew. There are many civilian injuries. There is no fire problem.

Captain Guidelines

- Describe Scene
