Role-playing Ideas

- Have one member “role play” the position of Engineer in order to provide a solution.
- You can also divide members into groups in order to develop solutions.
- Solutions should be submitted via email to tdg@lafdtraining.org
- Solutions from the field can be viewed online at www.LAFDtraining.org.

You are the Engineer assigned to Engine 69. It is approximately 1300 hours on a very hot summer day. TF 69, E23, E19, LF63, RA 69, EMS 9 & B4 are dispatched to a reported structure fire on West Channel Avenue. West Channel is a narrow street with parking on both sides. While enroute, T69 pulls over and allows E69 & E269 to proceed up West Channel first. Riding next to you today is a Captain working over-time from

another Battalion. He is not familiar with FS 69's first-in. You can see a “loom-up” and guess that you are about three blocks from the fire. The Captain pulls out the map and attempts to locate a hydrant. You observe a hydrant and the Captain informs you to pass it because there is a hydrant closer to the address. As you guide E69 around an abrupt corner, you are surprised to see the fire is only two houses away. The house appears to

have two rooms “well involved”. You look down the street and observe a hydrant approximately 200' away. E269 cannot pass E69. The hydrant that you passed earlier is approximately 100' away. E23 states they are three blocks “out” and want an assignment. T69 is located behind E269.

Engineer Guidelines

- Establish 2 supply lines at this incident
- Remove T69 from it's location and discuss alternate supply line methods
