

# TACTICAL DECISION GAMES

## TDG #3 Solution Worksheet

### **Fire Ground Considerations:**

- Locate origin of fire (basement, 1<sup>st</sup> & 2<sup>nd</sup> floors)
- Request additional companies
- Limit water damage
- Provide plastic, salvage covers, hall runners, pike poles, & inside ladders
- Safety of all members

### **Truck Company Actions:**

- Laddering structure with 35 extensions & roof ladders
- 1" hoses line for protection/ control spread with minimum water use
- Ventilation group must communicate with engine company and incident commander

### **Engine Company Actions:**

- Interior fire attack
- Make sure all occupants are out of the structure
- 1 ½ " holes line for fire attack
- Locate scuttle hole
- Pull ceilings and check walls
- Equipment needed: Thermal camera, inside ladders, pike poles, plastic and hall runners
- Communicate with roof operations and incident commander

### **Place First Alarm Assignment:**

- First Truck: Roof operations/ ventilation

- First Engine: Water supply fire attack
- Pump: Hydrant operations
- Second Engine: Check basement (if any), 1<sup>st</sup> & 2<sup>nd</sup> floors, back-up fire attack, bring up additional equipment, as needed
- Third Engine: Check exposure (if needed) and assist with inside work
- Rescue Ambulance: Additional ladders & utilities
