### Role-playing Ideas

- Have one member “role play” the position of Apparatus Operator in order to provide a solution.
- You can also divide members into groups in order to develop solutions.
- Solutions should be submitted via email to [tdg@lafdtraining.org](mailto:tdg@lafdtraining.org)
- Solutions from the field can be viewed online at [www.LAFDtraining.org](http://www.LAFDtraining.org).

You are the Apparatus Operator assigned to FS 105. Light Force 105 is “moved up” to FS 61 for the day. At 1600 hours, Light Force 105, Engine 61, Task Force 29, Engine 68, RA 61, RA 861, EMS 18 and BC 18 are dispatched to a reported structure fire at 360 Burnside (Park La Brea). The building is a 13-story residential high rise.

A smoldering couch fire in unit #812 is extinguished quickly by E61 and the incident can be handled by LF 105 and E61. The Captain from E61 requests ventilation for heavy smoke conditions in unit #812 and he also reports medium smoke in the hallway on the 8th floor. The building HVAC system is non-operational.

The building has a stairwell on the east and the west end. The stairwell on the west end has roof access.

### AO Guidelines

- Where will you position blowers?
- How will you utilize the stairwells to your advantage?
- Which part of the building will be pressurized first?
