Use Training Code 08AE for Network Staffing Entries

Role-playing Ideas

- Have one member “role play” the position of Apparatus Operator on Truck 72 in order to provide a solution.
- You can also divide members into groups in order to develop solutions.
- Solutions should be submitted via Dept. mail to the Commander of the Tactical Training Group at FHMT C.
- Solutions from the field will be printed in next months “Tactical Decision Games” publication.

APARTMENT HOUSE

Situation

You are the Apparatus Operator assigned to Truck 72. Your Task Force is dispatched to a reported structure fire. It is 0200 hours. When you arrive on-scene you find a three story apartment house with fire showing in one unit on the first floor. The fire has broken out of the window on the first floor and is beginning to “lap” up to the second floor. The fire is now directly exposing a second floor window. You “throw” the aerial ladder to the roof and the truck firefighters “throw” the appropriate ground ladders. Yourself and two of the truck firefighters proceed up the aerial ladder to check the roof. When you arrive on the roof, there are no obvious indicators that the fire has extended to the attic. You notice a penthouse door

approximately 75 feet away. Yourself and the two truck firefighters proceed to the stairwell with the two truck firefighters and you notify the IC. When you open the stairwell door on the second floor you encounter light to medium smoke. You proceed to the first fire door in the second floor hallway and you encounter heavy smoke upon opening it.

This Captain also states that the fire from the first floor unit has extended out into the hallway. You realize that the rest of the assignment is still over five minutes away.

You make the decision to proceed down the stairwell with the two truck firefighters and you notify the IC. When you open the stairwell door on the second floor you encounter light to medium smoke. You proceed to the first fire door in the second floor hallway and you encounter heavy smoke upon opening it.

AO Guidelines

- Determine crew actions
- Describe radio communications to the IC
